From the State Park website: "High Bridge Trail is 31 miles long and ideally suited for hiking, bicycling and horseback riding. Once a rail bed, the trail is wide, level and generally flat. Its finely crushed limestone surface and dimensions make it easy to enjoy. The park's centerpiece is the majestic High Bridge, which is more than 2,400 feet long and 125 feet above the Appomattox River.

High Bridge is the longest recreational bridge in Virginia, and among the longest in the United States. High Bridge, a Virginia Historic Landmark, is on the National Register of Historic Places. The trail is a National Recreation Trail recognizing exemplary trails of local and regional significance, connecting people to nature, to each other, and to our shared history and culture. Bring drinking water because none is available on the trail."

We hiked the Farmville to High Bridge section of the trail as an out and back. There is plenty of on street parking and other public parking close to the start of the trail. This trail is a very flat trail with no noticeable elevation change. The surface of the trail is packed hard so wear comfortable shoes. I normally take hiking poles but did not use them on this hike. The trail is exposed in many areas so wear a hat. The trail passes through wooded areas and pastures on the way to High Bridge. You will most likely run into more bikers than hikers.
